Summary:

Smart Disk Cleaner Pro allows you to create cleaning profiles, and can automatically run at system start without user intervention. It supports Internet Explorer, Firefox, Chrome and Opera as well as various 3rd party applications. This tool cleans a lot more files than most similar products and includes a "slim down" mode that gets rid of a lot of extraneous objects including wallpapers and other Windows files you may never use. Smart Disk Cleaner Pro provides an easy and comprehensive solution for uninstalling unwanted programs, whether they are installed ones running properly on your computer now or corrupted ones after failed uninstall. Additionally, Smart Disk Cleaner Pro helps speed up your PC by removing junk files and duplicate files, cleaning the registry and defragmenting disks. Smart Disk Cleaner Pro can completely remove more than one thousand commonly-used applications, like Windows Live Messenger, Adobe Reader!, AVG Anti-Virus, Bit Defender Anti-virus, ESET NOD32 Antivirus, Eset Smart Security, Kaspersky Anti-Virus, Norton Anti-Virus, malicious browser plug-ins and much more applications! The

Windows registry is the heart of your operating system. Every hardware component and software program that's installed on your computer creates a registry entry that contains information and user settings. Over time, as peripherals and software applications are installed, upgraded, and deleted, the Windows Registry becomes clogged up with entries that are invalid or unnecessary, which can lead to erratic system performance and loss of valuable disk space. Smart Disk Cleaner Pro provides a lot of functionality from a simple, elegant, easy-to-navigate, and clearly labeled interface. This free app lists six categories of items to clean: Windows Histories, Program Histories, Browser History, Cookies, Messengers, and Plugins. Windows Histories included Run Command, Find File, Start Menu, Recent File, Task Scheduler Log File, and other similar areas. Each category offered a similarly full listing of items to clear or leave intact. We liked that Smart Disk Cleaner Pro had an option for backing up the Registry before cleaning and had flexible options for scheduling cleanings, cleaning on start-up, and shutting down or restarting your system after cleaning. This software performed very well in our tests, responding quickly and executing its commands in a very short period of time. It was easy to use, making it a great tool for novices and experienced users. By making it simple to do routine management on your system, Smart Disk Cleaner Pro keeps your computer running smoothly. You can manage the Windows Startup process, ensure that programs are uninstalled properly, and automatically schedule your detection and maintenance scans.
